## SUSTAINABILITY

Three years ago, our commitment to sustainability led us to banish single-use plastics from our hotel, a decision we stand by unwaveringly. Our bath amenities reflect this dedication, with locally sourced, all-natural products housed in specially crafted containers. While some guests have expressed a preference for high-end brands, we remain steadfast in our choice to prioritize eco-friendly options. Our spa offerings showcase the diversity of Mexico, from certified organic coconut oil to locally extracted white copal from the jungles of Chiapas. Throughout our operations, we prioritize reforestation by planting coconuts and palm trees, while also embracing reuse, recycling, and responsible waste disposal practices. From biodegradable cleaning products to energy-saving initiatives like low-consumption minibars and a treatment plant system for wastewater recovery, every aspect of our hotel reflects our commitment to environmental stewardship.
